

SENTO

Portable Protection with Eyes Everywhere

Sento Security delivers all-in-one security and surveillance solutions through its innovative portable units—fully integrated systems designed for rapid deployment in any location within minutes. These adaptable and intuitive units are powered by cloud-based analytics and video management, making it easy to customize alerts and monitoring to fit your specific needs around the clock. Whether you're securing a remote site or a busy public space, the Scout unit offers a cost-effective alternative to traditional staffing, helping detect and deter high-risk events without sacrificing coverage. With quick setup and flexible configuration, the Scout unit ensures immediate, reliable protection that's as smart as it is simple.
